

METAL FORMING

Application: laser tube cutting machines

SUPPLY: Hydraulic power unit for laser tube cutting machines

CHARACTERISTICS OF THE SYSTEM:

- Hydraulic power unit for automated laser tube cutting machine, designed for the cutting of big tubes (up to 508 mm)
- Installed power 37 kw on a tank with capacity of 400 liters
- The hydraulic power unit controls the balancing and clamping of tubes during the operation phase
- Independent combined group for high pressure (250 bar), fluid conditioning and filtering
